

Adjustable Bath Step

The height adjustable bath step allows the user to efficiently and safely adjust the height of the step to assist them when entering and exiting the bath.

The product consists of 4 x 25mmH sections that stack one on top of each other and feature locator pins that fit firmly into the section below.

The bottom section has four rubber feet to prevent any slippage of the step when in use and the top area of each section is textured to provide a slip reducing surface.
